---

TO WHOM IT MAY CONCERN

Please consider this submission into the "Fly in, fly out and other long distance commuting work practices in regional Queensland" inquiry.

A lot of strain put on workers being away from their families with a lot not even given the choice to live where they work and pressures put on the communities from which these mines operate out of

The impact that it leaves on the communities from which these mines operate out of with diminished services and population and the risk to road users with a lot of commuters traveling on the road and straight after night shift

Implement the recommendations of the Windsor Senate Inquiry in FIFO/DIDO

Regards

Steven Grant
