Subject: Re Transport legislation amendment bill 2015
Date: Sunday, 18 October 2015 9:23:16 AM

Dear Committee, As the owner of a qld taxi license i am concerned about the following due to the introduction of uber and other illegal taxi services

1. The value of my license now falling below the purchase price and becoming worthless.
 2. The plans i had to become a self funded retiree will soon see me on a pension as income dries up.
 3. I have just had to pay the state govt. charges being accreditation, security levy and license renewal without knowing wheather i can obtain a resonable income in the near future. Has urber had to pay these charges?
 4. As the state govt. issues the licenses through the tender process it is up to the state govt. to now move to protect those that followed the rules before its too late.
 5. My children would have eventually inherited my license also guiding them into a self funded retirement.
- Therefore i fully support this bill and hope the committe does to.

Regards Mark satterley.
