**Importance:** Low

---

Hello I wish to lodge my objection against UBER.

I wish to object to this illegal and foreign company taking the profits of hard working Australians.

I cannot understand why the government is continuing to do nothing and defer the legislation until August of next year in light of the current agreement which expires this month.

The noncompliance of the illegal taxi operators is not fair competing with registered and controlled taxi industry. This is to the detriment and safety of our society.

As the Taxi licencing scheme is administered by the Queensland Government, it is bewildering why the government is continuing with a "wait and see" attitude. It is undermining its own revenue base and legislation.

We currently own 2 licences and by the governments actions the value of these licences are significantly devalued.

Timothy Galvin
