---

I have been in the taxi industry for 40 years and we have a good system in place, So why would a government let a foreign multi national company start an illegal taxi service that is not paying tax and breaking every law in the book. If you let them keep going you will send the plate holders broke some bankrupt and put many drivers and owners on welfare and the pension . As a result of this they will also let their private health go. These figures do not add up,people are using uber because its cheaper. Remember the chop chop [ illegal tobacco] every body wanted it because it was cheep, but the government had to close it down because it was illegal and they they were not getting any tax.I did not vote for a government to up hold some laws and not others you are the government up hold the law. At this point i have lost all faith in the government and the police force who have sat back and done nothing.
