My husband is driving the taxi from last ten yrs. The taxi industry is the main source of income for my family. I joined my husband six months back. I am getting settled in a country, where every person is treated equally irrespective of cast, gender or profession. At the moment, we are looking to buy our first home, for which we need deposit to finance the loan and to start a new life in a beautiful country.

But, if you will not take a strict action to stop these Illegal apps, it isn't possible to fulfill our dream of new home.. We need your help to stop the illegal taxi apps. We need to have the same rule for the whole industry.

Competition is always good. We are doing the right thing, delivering the right service to the public. The taxi industry is the safest service to the public and the driver and it provides a large revenue for the government. These illegal apps are doing the opposite. My future and my family's future is in your hands. It would be greatly appreciated if you can stop these illegal taxis.
