SUBMISSION

My concerns:

1. The relative price of fuel (LPG mainly)
2. In Brisbane
3. In Townsville
4. In Cairns

My interests – the price of LPG in:

- (a) Brisbane
- (b) Cairns
- (c) Why a price increase for Cairns of 8c/litre

As you travelled the state you would be aware of a price difference between Townsville and Cairns. As an example, two months ago LPG in Townsville was 49.9c/litre and in Cairns 52.9c/litre to 56.9c/litre.

I am not aware of the price of LPG in Brisbane but do know the difference for LPG is greater than that for petrol. If your committee has noted this in your travels I would be very interested to know your findings. LPG has to be cheaper than petrol as more is used to go the same distance, and if it goes more than half the price it is not worth using.

Hoping you can provide some answers on this subject.

I remain yours

N Marbell
