It is unbelievable that the government is trying to make our environmental laws weaker by cutting down Reef pollution. The Great Barrier Reef World Heritage is the lifeline that supports so many lives including all the animals and plants that live in it and people whom depend on its healthy and flourishing state. It is not acceptable for man to be killing this great natural phenomena that we depend on. However, I strongly support the Queensland Government new laws to ban outdated polluting farm practices that are harming the Reef.

Best regards,  
Kawinwit Kittipalawattanapol
