---

The Great Barrier Reef is abundant with marine life and its within these reef systems that many animals and tropical fish travel to. But the health of this important ecosystem is under increasing threat.

The Queensland Government has taken draft laws to Parliament to cut Reef Pollution.

Please support new laws to ban outdated polluting farm practices that are harming our Reef. We only have one earth to live on and we don't know the consequences of the reef dying.

Please, please help the Great Barrier Reef and its eco-system to stay in tact.

Thank you for your assistance  
Joan Knipe
