Subject: New Laws to ban outdated farming practices.
Date: Thursday, 14 March 2019 8:28:34 AM

I am pleased to hear the Queensland Government is legislating to protect the Great Barrier Reef by banning outdated farming practices that have been shown to damage the reef environment. I formerly ran a sailing boat charter business in the Whitsundays and hence have a good understanding of the economic benefits of the reef to the Queensland economy. Naturally there will be opposition to your proposals, but I urge you to continue with this legislation for the good of Queensland, Australia and the World.

Regards,
Grant Leigh Atherton
