---

To whom it may concern,

I'm writing to inform you of my deep concern for the GBR.

Australia currently has the shameful record of the Second highest rate of extinction globally. As a developed nation with appropriate technology we had a duty to conserve our natural environments for biodiversity for tourism and for untold future benefits.

We must reduce nutrient run off and ban dumping of spoil near our reef.

I call on our government to do the right thing before we loose our beautiful reef as we know it.

Sincerely,

Jeremy Ryan.
