Subject: Stop pollution on the Reef
Date: Thursday, 14 March 2019 8:24:24 PM

Hello

As a concerned Australian I am asking that laws to protect the Great Barrier Reef be legislated.

By ending run off from agriculture and ending coal mining in Queensland the Reef could be supported so that it could have a chance to restore itself and survive for future generations.

This is not just important for Queenslanders. It is important to all Australians and indeed the many tourists who come from many countries to see the Reef, adding to the Queensland economy.

The time to protect our Great Barrier Reef is now, governments must take action now.

Thank you, Kim Miller
