Acting Committee Secretary
Innovation, Tourism and Environment Committee
Parliament House
George Street
Brisbane
Qld, 4000

Dear Sir / Madam,

As usual, legislation has been passed with the aid of the Greens [REDACTED]

[REDACTED] – with very little consultation with producers.

It is only of late that I have realised the seriousness of this draconian legislation.

It is typical of Government to 'throw the blanket' over everything to achieve their goals.

My operation is organic A grade with Australian, Korean and USDA certifications and obviously the einsteins that bought these laws to pass don't realize that we only use natural fertilizer inputs and absolutely no chemical application such as herbicide or insecticide.

The money spent on 'feel good' legislation and the 488 million dollars gifted to the Barrier Reef Commission would be much better spent on more major dams and weirs along the Fitzroy system

to mitigate extreme floods and allow 24/7 environmental flows.

My business will now be definitely stymied by these laws even though it is a pristine farm operation.

I am absolutely fed up with being dictated to by bureaucrats from the south east with absolutely no on- ground experience.

Yours Faithfully

M. J. Wagner.
