**Subject:** Great barrier reef water quality laws  
**Date:** Friday, 15 March 2019 11:30:55 AM

---

I'm writing this submission in favor of protecting the water in the Great Barrier Reef area. The reef condition is already in decline and further inaction will lead to it's further demise as well as the demise of dependent ecosystems. Please strengthen the protection of Australia's world heritage sites. I hope one day to be able to show my children the reef, which they only experienced through books and television.

Thank you.

Michael Stegherr
