Subject: Great Barrier Reef draft laws
Date: Wednesday, 13 March 2019 8:12:39 PM

I would like to submit my support for the Queensland Government's draft laws for curbing pollution from farming practices which are affecting the Great Barrier Reef. Run-off from chemicals kills off the coral and harms the whole basis for life on the Reef. The Reef is already in grave danger of dying – we cannot have that and I know that the people of Queensland and the Queensland government are determined, as evidenced by these draft laws, to prevent that happening.

I applaud these laws and hope that they will be passed.

Thank you.

Pamela Walker
