Subject: Submission on Environmental Protection (Great Barrier Reef Protection Measures)
Date: Friday, 15 March 2019 3:22:57 PM

The Reef is in trouble because sediment, fertiliser and pesticides are flowing into the Reef waters. We have know about this issue for a long time now. Further action needs to be taken before its too late, many people believe its already too late, however I'm too young to think this. I have a life time ahead of me and i want healthy reefs in my future!!

Please.

Yours sincerely,
Nina Mackellar
