Property developers and similar industries being allowed to make political donations should not be allowed, as this cohort of donors is commonly linked and proven to increase corruption in government and remove positive political decisions for a more bias decision towards the largest donors. This change allows our government to be run by the highest bidder with the threat of donations being cut off if the donors don't get their way.

Allowing political parties to utilise loans should not be considered as the loans would be paid using taxpayer money, this is an unfair rule to gain a financial advantage with no financial impact to the political party and instead impact to the taxpayers of Queensland.

We should not allow political parties to be money hungry and chosen based of financial gain, political parties should be chosen bases on good legislative and policy decisions not who has the most pull and money.
