Hi Russel ,

Hope this letter finds you well ,

I am writing to you in relation to the proposed tightening our capacity of our gun laws , proposed by the Albanese Government .

Firstly as a club and recreational shooter , I am asking for your support as a whole for QLD and all of Australian law abiding firearm owners ,

that we have already tight approval in place in by Sate Government Qld and enforced by Qld Police, which we have to meet strict eligibility and compliance requirements to hold these firearms .

The Albanese Government have taken a very knee-jerk or reactionary legislation that is not sensible or finds no common-sense in there thinking ,

To target innocent law abiding citizens , to justify there position as the government , this is a band aid and not the real problem .

Two wrongs don't make it right .

The problem is antisemitism and terrorists radicals allowed into our country , allowed to walk amongst us unchecked , it does not matter if these radicals have

One gun or ten they can only use one . These are the issues that need to be addressed by our so called government not use law abiding citizens as the scapegoats , as not addressing the real problem in Australia terrorist Islam radicals fighting , there overseas wars on our shores .

I think we need European and overseas ideals in this country as our security in Australia is appalling compared to overseas nations , who have intelligence police in place and highly trained armed Police with a sub- machine gun around there shoulders ,supervising and monitoring crowds at any gathering or public place which we have no such safety for

our people in place . We as Australians are now not so far away from overseas hostility any more , and the troubled nations that have been fighting since before Christ BC , have now brought

there anger here against the jews .

I would appreciate if you could respond and pass some comments of mine onto cabinet , in the interest of our people and the good of the nation as a whole . Thank You for your time .

Kind Regards ,
