I support the proposed Fighting Antisemitism and Keeping Guns out of the Hands of Terrorists and Criminals Amendment Bill 2026 in its entirety. The Qld governmental has used actual factual data instead of feelings and beliefs in displaying the truth about not only antisemitism terrorism and firearms in stating proposed legislation. Qld already has robust firearms legislation with regulation, license holder requirements and applications, the failure of other states in their approach to legal firearm ownership and licensing shouldn't be a catalyst for Qld to change their regulations nor should the "feelings" of self interest groups be taken into account with actual factual data being used in regulation formation. the failure of NSW police in the Bondi terrorist attack of giving a licensee to a person absolutely not fit to hold a firearm and to let the license drag over a 2 year period and still issue a license is ridiculous. AS a license firearm owner in Qld for over 20 years and 10 years in other states I believe that the proposed legislation focusing on the criminal element of firearms is critical and the legislation put forward is correct in identifying and dealing with criminals and criminal elements in QLD, this also rolls onto the Antisemitism element of the legislation in identifying and prosecuting criminals.
