After 35yrs on the front line providing security services, its got 100% worse. Because there are no real consequences for the offenders is the reason why we have got to the point we have. like the kid who stabbed the Vet at the shopping centre, 189 days in jail then bailed again, he was out what 5 days or so, before doing a home invasion with a machete! the judge should sent back to traffic court for his incompetence! The community has had enough of that sort of rubbish from the system!! the system has a duty of care to the public / community! offenders should have to pay for the rest of their working life till they pay victim medical or damage bill. goes back to first issue no real consequences! After escaping a recent carjacking, i found the police are overwhelmed with the amount of crime i didn't even get a response after reporting it! its the current three young lunatics breaking into shops, i guess they like my 4x4 for a ramp raid. But i was quicker and smarter seeing them coming at speed, all persons in car wearing ski masks and hoodies could only see eyes! also needs to be consequences for judges who repeatedly let out dangerous offenders and they harm the community. sick of hearing about the judge saying how poor john had poor upbringing and then give a light sentence! deport violent criminals, why should the community continue to pay for them! the judge should talk more about the severe impact the offenders action have had on the families and victims! poor to no victim support, or imput. the criminals get all the help! why is a risk assessment not done before the judge releases these violent crims especially repeat bail offenders! where the judges duty of care?
