

22nd September, 2012.

Mr John-Paul Langbroek,

Education & Training Minister.

My name is Donald Avery I am 81 years of age, and I reside at the above address where I have resided for the last nine years. When I first moved into these premises the Body Corporate rates were fixed, I was one of the first tenants in this building, later on new tenants arrived and wanted to change the body Corporate, which they did.

Later the local Minister of the Labour Party took it to Parliament and had the law changed for the Body Corporate to reverse it back again, now this new L.N.P. Government which I voted for has changed it back again to please their rich mates, which is of no financial benefit to the Government.

I will probably have only a few years to live and how many more changes are going to happen to this Body Corporate in my lifetime, other states have worked out this problem but not this government.

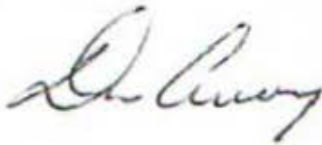

The cost and the worry attached to this change is going to affect all people living in units, who would want to buy a unit with all this change going on.

This present government is a dictatorship with no thought to people that voted for them.

Thanks very much of nothing.

Your Truly,

Donald Avery.
