Dear committee members

While attending the Premier's personal apology in parliament recently, I was horrified to learn of the large number of individuals who have been effected by these laws and the array of 'crimes' that they were charged with. As a citizen who has been charged and convicted of one of these 'crimes', I wish to encourage you to ensure that as many injustices as possible are able to be righted.

This action which you are now undertaking will enable many (including me) to finally resume a 'normal' life, and families and loved ones of those not with us any longer, some comfort.

Kind regards

Alan Raabe
