I am appalled to find out that your government want to remove the requirement to show ID when voting. Everyone is used to showing ID almost everywhere they do any kind of business or personal contact. Why should it be removed from voting? It only makes it easier for people to lie about who they are: do you really want to take the chance of dozens or hundreds of people's systematically casting extra votes in who-knows-how-many polling booths?

Please act to secure our voting system and prevent fraud.

Thank you for your attention
