**Subject:** Removal of requirement for voter ID.  
**Date:** Thursday, 9 April 2015 7:56:09 AM

---

To whom it may concern,  
this is a blatant attempt by the minority labor "Government" to enable the rorting and unlawful manipulation of the voting system by clandestine means.

If anything we should be toughening up the requirement for voters to be identified when presenting to exercise their vote.  
It is a basic requirement to show ID for just about anything else in this country ie open a bank account, get a passport or even get into a social club.

This is just another form of the weakening of our State and Country`s values and in this current International climate and the Country`s Alert Level at HIGH we should be raising the bar not lowering it.

Yours sincerely  
Bill Cochrane
