Hello

I am concerned with the objective of the bill to remove voter proof of identity requirements before a voter casts their vote.

Providing ID has been widely accepted by the community, and by removing the proof of identity, how are you going to minimise the possibility of voter fraud? I am concerned that removing the ID will result in an increase in voter fraud - and that the integrity of the electoral system will be affected.

Please retain the current requirements to provide ID before casting a vote.

Thank you
