Dear Premier and Labor Govt

I have just learnt that there is a new proposal to not show formal ID (licence or passport) for voting at elections. I cant imagine why anyone would want to change the existing laws in this way. Our constitution and laws are based on the right to guard integrity and honesty so we can live in a true democracy

There is too many situations of fraud all over the world and those with malicious intent could easily bribe others, some would manipulate the system in their favour and the whole election vote would be unreliable and therefore invalid

I cant imagine anyone giving this a go ahead. I think it has been presented quietly to outwit voters and to catch them off guard

Please return to the same safeguards of formal ID and don't compromise our right to have an honest voting system

Gail Petherick
