---

To the Newly elected Labour government of Queensland, I do not understand why you are planning to remove the need for the showing of personal ID prior to voting . In this day and age it is a very dangerous and backward move . And why have we not heard of this plan in the Main Stream Media ? It appears to have been very quietly planned ..... Please be assured that this would be a very detrimental move in the name of democracy ID is needed for much less important procedures so One fails to understand the need for a change ie collecting of parcels from the post office and joining a library all require sighting ID . Please DO NOT change this law and I know I speak for the silent Majority Thank you for your consideration of this matter
