---

dear committee members  
please consider the voters who will be physically and mentally challenged by  
more stringent electoral ID conditions  
who simply do not have available such instruments of ID but still have every right  
to vote, this is discriminatory  
the added cost to elections without clear benefit  
IT is not like there is any proof of wide-scale malpractice by voters in the past  
throughout the long history of state and federal elections

in short- it would be onerous and unnecessary,discriminatory and costly
