I am concerned about the introduction of laws which, it seems to me, are going to make it harder for people at the margins of our society to vote... I believe compulsory voting is great, but for some people it's more complicated to fulfil this obligation than others. Voting needs to remain as simple as possible for ALL eligible people. Also, the checking of IDs would seem to me a waste of time and money.

Please be very sure how these laws might impact on our community.

Thank you,

Kerry Lawrence
