Subject: Electoral Reform
Date: Thursday, 16 January 2014 1:13:21 PM

The changes to electoral procedures requiring presentation of identification on election day are an affront to democracy and must be rejected as undemocratic.

As many people as possible must be free to vote. Voting should be an easy and stress free democratic process. The voting process must not discriminate against people who do not have suitable identification such as elderly, disabled, homeless people and people who live in remote communities such as our indigenous citizens.

Please reject these changes to the Electoral Act.

Ian Heath
