---

I am becoming increasingly concerned at the Newman government's slide backwards to the bad old days of the Bjelke Petersen days in Queensland. The proposed "reforms" to voting procedures are clearly aimed at likely Labor voters and without conclusive evidence of voter fraud are yet another attack on hard won democratic values.

The attorney general is proving yet again to be a rather dangerous right wing extremist. Maybe it's the Scandinavian background he shares with Bjelke Petersen!

Terry Padley
