Once again the Fascist Newman Junta is trying to manipulate the way people vote, since this Junta was elected all we have seen is manufactured mayhem all the while trying to put a smoke screen over the sell off of state assets and privatisation of government public services, and now in a pathetic attempt to save as many seats as possible at the next election by creating confusion at the polling booth, these tactics are straight out of the US tea party's hand book, Newman is being exposed as a cheap spin doctor who is only surviving because of Murdoch and his el cheapo tabloids but more and more people are waking up, this Junta must go.
