Research Director,  
LACSC Qld Parliament,

I and those in my family all agree that this change to the public holidays is the right choice. The former government was aware from the previous public submissions & petition that people thought that there were too many public holidays congesting the period around April/May & then they chose to move the holiday in June which didn't change things for the April/May time anyway. The new dates suit this well and also align Labour Day with the majority of states which means less disruption for industry & business.

Great choice & please stick with it.

Yours truly,  
Chris Knight
