Q5: Do you think that human rights are properly protected in Queensland? Why/why not?

No, a basic human right is having the choice of medical-herbal remedy. Cannabis is a herbal medicine the right to use this a medication was taken when drug prohibition laws ruled in favour of big chemical companies and classed cannabis as a prohibited drug; (cannabis should not be classified as a prohibited drug)

Q6: Do you support the introduction of a Human Rights Act in Queensland? Why/why not?

Do we need an Act to protect our human rights? A Human Rights Act must sustain and protect our rights to be individuals as we choose, so long as no other individual is affected negatively by ones choices and actions. If the Act brings forth and sustains my right to choose such as a choice to use cannabis as a medical remedy, then I would support the Act.

Q7: Can you think of a situation from your life or someone else's life that shows why Queensland needs a Human Rights Act?

Many people even children have illness' that have been cured or greatly aided by medical cannabis. I believe we as humans have the right to choose a medical treatment that best suits our individual needs. Our human right to use cannabis as a medical treatment was stripped from us only so that large chemical companies could monopolise our medical treatments. Cannabis is a herbal remedy that should be available to all humans whom choose that type of medical remedy; before drug prohibition it was a herb that was grown in many herbal/vegetable gardens: such as garlic is used as a herbal remedy to ward off colds & flu, cannabis can be used for a wide variety of ailments. (aches/pains/cramps/nausea ,epilepsy, cancer, depression just to name a few).
