The following should be human rights

- To travel without additional cost (other than vehicle costs) on all of the roads of Queensland. Tolling of roads should be banned.
- To be free from development and building costs to the council and that the approval period be speed up – The council should just ensure that the building or development is according to the Australian standards.
- To be free to make the decision whether to send my child to school or not.
- To not have to have any compulsory medication or injections and not suffer any consequences of that action.

Regards

Neil Skilbeck
