Subject: Bill of rights.
Date: Thursday, 14 April 2016 8:29:30 PM

Firstly when you have little or no confidence in your government how can you justify into agreeing that we need a bill of rights. Citizens of this state have no rights especially now when we are run by a fragmented government that does not have a mandate from the majority of voters in this state. We have heard the cry of gerrymander by the Labor hoards when Joh was in power, we heard the cry about no house of review but forgot to go back in history and check that it was they who dissolved the Upper House in this state. In the past 26 years I have seen freedoms taken away, laws watered down or removed, I have seen domestic violence and the impending fatalities that result from these at epidemic level. Drug and liquor access at an unprecedented high, prostitution legalised, gay marriages forced upon us, religious education removed from many schools, Safe School program that is abominable, and the list goes on and on. A bill of rights will further remove the last bastion of normality which many of our generation hold dear to us. For you who don't believe in God and don't believe in heaven or hell, I suggest you get on you knees and pray that you are right because you who make a mockery of those who believe in righteousness and having a moral and loving relationship with God WILL find out the hard way.
