To whom this may concern

I wonder if you realise the major impact this bill will have on pt care in rural areas? No HP in their right mind and proud of what they do will continue working for QLD Health knowing they are being undercut. I ask someone on this committee to come and spend any given workday with me to see my workload and pt care to understand my frustration at our unfair treatment. I have been on call 24/7 for the past 5.5 yrs working solely with a workload for at least 2 people. Service is vital. Just how is this going to be upheld?

Yours sincerely
