Subject: Submissions from this Queenslander on the legislative proposal.
Date: Tuesday, 14 May 2013 7:59:43 PM

This is my response to the Objectives of the Bill,

- For who,
- Need examples of officers abusing positions,
- Choice is there now, if employees don't want to join an industrial organisation they have that now & don't need legislation changed to make that decision so what point are you trying to make,
- I need more info,
- You want to go the cheapest contractor who probably won't finish what they are engaged to do as they will go broke because they bought the job & they will screw over their own employees of entitlements to make themselves a profit,
- Stop the people who stand for those not capable to stand up against the Bullies/Dictators out there in the working world,
- Force the working people onto crazy payment plans that they might not be able to afford to pay back in some ridiculous timeframe,
- Another person to screw over the working class, you do know we already have a commission for that,
- There is already a definition of a worker, another example of this government screwing over the working class.

Thank You, Gerard.
