Dear Sir/Madam,

Human rights?

The most basic of these is the right to life. How an unborn child WITH A HEART BEAT has no right to life is beyond my understanding.

We should all have the right to our beliefs and the right to practice those beliefs and not be forced to accept what others believe. This includes churches and schools. I doubt any political party would knowingly hire a member of another political party so I don't see why any church or school should hire someone who doesn't agree with that particular establishments way of thinking.

We should all have the right to water especially when it falls from the sky onto our property!! Whether we catch it in dams or tanks or some other container we should not be charged for it!!

We should all have the right to move freely UNLESS it HAS been proved we are up to something. Little old ladies getting thrown to the ground on wrong information is unacceptable.

Yours sincerely,

[REDACTED]

Grace Field.
