Dear Members,  
Thankyou for the opportunity to provide feedback on the Summary Offenses andOther Legislation Amendment Bill 2019

I am writing to express my deep concern and opposition to these proposed new laws, which are disproportionate, over reaching and appear to have no evidential basis.

Although I do not live in Queensland, my son and daughter do and my three young grandsons will live and grow there.  
I am also concerned that other States may try and copy cat on these proposed superfluous laws to restrict and erode our democracy.  
Australia has a proud history of successful protest movements using civil disobedience.

In this "Climate Crisis", which is a genuine threat to health and safety, I support those that choose to peacefully lock on to assist in bringing about the changes our society and environment needs, so my grandchildren will have a livable future in Queensland, Australia and Planet Earth.  
Regards Desnee McCosker
