

Weapons (Digital 3D and Printed
Firearms) Amendment Bill 2014
Submission 001

From: [REDACTED]
To: [Legal Affairs and Community Safety Committee](#)
Subject: Comment on Weapons Amendament Bill 2014
Date: Thursday, 5 June 2014 3:26:36 PM

Dear Sir/Madam

I would like to submit my comments regarding the proposed *Weapons (Digital 3D and Printed Firearms) Amendment Bill 2014*. Please excuse the crude nature of my comments, but the sheer stupidity of this Bill can provoke nothing else.

Queenslanders already have one of the most draconian Weapons Licensing regimes in the Western World. As such, I am fundamentally opposed to any further evolution of these. The fundamental premise of the proposed Bill, to legislate the manufacture, distribution, and ownership of firearms that are manufactured by digital fabrication, is in-its-self redundant; as these aspects are already more than adequately covered by the existing *Weapons Licensing Act, 1990*. Furthermore, the proposed Bill both infringes of fundamental freedoms and simply, with the stroke of the pen, proposes to create another class of criminal. To prove its total stupidity, the proposed Bill even makes it illegal, to simply to devise, transmit, or even publish a document that contains the 'new evil' of digital 3D firearms!

I trust that the learned members of your committee will see this Bill for what it is – a totally idiotic attempt at publicity, created in the perverted minds of imbeciles.

Your sincerely

David Nielsen
