**Subject:** RTI Legislation

Dear Committee Members,

We appreciate that this submission is late, but we also understand that you have extended some latitude.

We fully support any legislation which increases the accountability of government.

We believe that this legislation supports full disclosure by government and closes any anomalies that may preclude private companies constituted, in part or whole, by the Government of Queensland so that they are subject to the same regime as any other entity created by the State.

Should the parliament consider rejecting this Bill would be contrary to public interest.

We also fully support the submission made by the KWRA

Yours sincerely.
