Dear Secretary -

I agree with the views expressed by the REIQ

I am disappointed that the Property Law Bill was prematurely introduced into Parliament while there is still material matters to be worked through.

The REIQ and the Unit Owners Association of Queensland have raised a number of concerns with the proposed legislation and the lack of communication with other interested parties.

This proposed Bill has considerable legislation impact on property ownership, sale and purchase of property in this State.

To be given less than 2 weeks in which to study this 300 page proposed bill and to make a submission is beyond belief considering that this proposed legislation has been in consideration for at least 2 years is beyond belief.
