Submitter Comments:

Adoptees have been fighting to have our birth certificates registered with our original birth parents and birth names yet this has been denied to us. And now the LGBTIQ communities are being given the right to do this before us. The government promised it would do all it could to help support adoptees right the wrongs it committed against us. Yet we have been denied. Whether you're two males or two females, there will always be a biological mother and father. You will be also denying these children the right to their genealogy, biology and heritage. Despite your diversity, there will always be "sex" of a child and parents. I request that adoptees be given this right to have our birth certificates.
