Subject: The Self ID Bill

I am writing to ask that this bill not be passed. I believe it is NOT in the best interest of women and our children growing up. To add more confusion to life about identity is not needed when life itself has so much to navigate. Giving men in particular the opportunity to change their identity has been known to allow them to manoeuvre their way to hide their true identity and intentions. Allowing this to happen undoes all the positive work that has given women standing in the workplace and community.

Allowing this to proceed immensely impacts who we are as women and would denigrate all that has been achieved to date.

It was promised that nothing would change after giving LGBTQ the right to marriage, don't let this be a lie endorsed by the QLD government.

Thank you for hearing my concerns and appreciate that most women I know feel the same so please do not dismiss us.
