Submitter Comments:

I can see no good reason for this Act to be put through Parliament. We were given two genders - male and female - and if some people wish to change their gender via surgery that is their decision. However, to rush this Act through (as it appears to be happening) is criminal. No good can come of it. Paedophiles could change their gender and choose to live in areas they're not supposed to, eg schools, etc and causing many problems in the community. We have enough problems with youth crime, murders, car and household thefts without more. We don't have the number of members in the police force to cover all these issues as it is. Labor is good at endeavouring to put things that the community will be adverse to through in haste and I am happy that this came to my attention. Please do not allow it through. It can only cause major legal issues.
