

Births, Deaths and Marriages Registration Bill 2022

Submission No: 91
Submitted by: Peter Hadfield
Publication: Making the submission and your name public

Submitter Comments:

I regard your movement to remove the existence of real women and allow any man to nominate to be a woman to be against the interests of women. It is not true that so called trans women have the same propensity for sexual criminality as real women. These trans women act in accord with the same rate as male sex offenders. I will not allow you to force me to call a man a woman. Such gas-lighting is unscientific. You can legislate what you like but there are only two sexes and your government is neither a God nor does it have the ability to vary the natural laws of life. You are already pushing for child mutilation and I object to that. No one should have their breasts or penises removed using government funds when their lives are not threatened by a real disease. Your attempts to mutilate children brings dishonour to the state of Queensland and at a future date when the harms your laws have done become apparent future citizens will condemn you for the harm that this legislation does to women and children. Until then all who support this legislation should be forced to wear a badge indicating their desire to mutilate children and harm women. Ask yourself why drag queens are so keen to spend time with children and understand the risks that your legislation presents to those who most need our protection.
