Submitter Comments:

We the people as a majority do not accept this proposal for sex self ID laws. This has been put through secretly and dishonestly, the majority of people are not aware of this bill or the ramifications of it. There is no doubt whatsoever that you will be exposing women and girls to extreme danger. This is a complete violation of our constitutional rights and our rights as sovereign beings. There is no doubt whatsoever that the wrong people who are sexual deviants and predators will take advantage of this proposed law. That is what predators do, they take advantage of situations and now you are handing them a way to commit crimes against women so easily it's ridiculous, and you are potentially trapping women in with predators, or in quiet public bathrooms and definitely no way to escape for women in prisons where it is proposed this will also take place. Our children will never be safe, this government has become evil and criminal and has a lot to answer for! I believe many of you will end up in prison over this! *And you would deserve to be locked up with a dangerous sexual predator, but unlike you evil people I would not wish that on anyone!
