SUBMISSION re GENDER SELF ID BILL

There's so much to say about what a bad idea this bill is, but I'll keep it short:

1. The conflation of 'gender' and 'sex' is a big problem. Most people would agree with relaxing rigid gender stereotypes but NO ONE can change their sex.
 2. Allowing male bodied competitors in to women's sport is physically dangerous and the elimination of real competition in women's sport because of the testosterone based strength advantage in transwomen.
 3. With self ID, male crimes will be added to women's statistics
 4. Children follow fads and trends, especially on social media.... automatic transing of children must stop. Over 90% of gender confused kids will grow out of it with support.
 5. And finally, we live in a society that is dangerous for women. Can't walk home at night, leave drinks unattended at a bar, be safe in your own home or car.
1.5 women per week are murdered by males in Australia.
- If this bill is passed, there will be no Women's Only ' spaces. Males claiming to be women can access women's toilets, change rooms, women's prisons. Some will be predators...do you want your daughter, sister etc to be exposed to them? Sex-based women's only space must be protected . In fact, sex based categories on birth certificates must remain. All health statistics and census data depends on it. This is a social experiment that has gone too far.

Yours sincerely
