### Submitter Comments:

I support this bill to be passed. Transgender, non-binary and gender-non-conforming people continue to be faced with issues that surround their identities not being acknowledged on legal documents such as birth, marriage and death certificates. Issues faced include: •confusion •harassment •danger This happens when details such as name, sex and gender are at odds with how the person lives their day-to-day life. Not only can this be difficult emotionally, but endangers the lives of trans and non-binary people when met with document inaccuracies. This is exclusion and discrimination, which the LGBTQ, and especially the trans community, already face socially. This bill would allow people to be accepted legally as the identities they are living as.
