### **Submitter Comments:**

Births, Deaths and Marriages registration is about recording events. It's recording the time, the place, and the people involved is what is important and thus this information shouldn't be unchangeable. The essence of any event. Other information just needs to be correct and correctable after the fact. Because gender isn't set and unchangeable, people need to be able to adjust/correct this in old documents and need to be able to decide/nominate what is to be used in future documents. Trans people deserve to have their wishes respected on these documents.
